Alloy 7050

7000 series | Reference sheet | Data checked 14 October 2026

An aerospace structural aluminium alloy referenced in stress-relieved sheet, coil and plate conditions. Direction and specimen basis accompany its typical strength values.

Scope: Selected reference facts; incomplete alloy coverage

This reference sheet is not a material certificate, procurement specification or source of design allowables. Values apply only to their listed form, temper and condition. Confirm current requirements with the supplier and governing standard.

Forms and tempers

Forms: Sheet, coil and plate

Tempers in record: T7651, T7451

Selected physical properties

Density: 2830 kg/m³

Temper: Not specified | Form: Sheet, coil, plate | Condition: 20 °C

Basis: typical | Verification: single-source | Source: kaiser7050 | Checked: 2026-10-14

Selected mechanical properties

T7651 | Sheet, coil, plate

Tensile strength	Yield / proof strength	Thickness / specimen scope
552 MPa	489 MPa	Longitudinal; 0.500 inch diameter specimen; thickness unspecified

Condition: Supplier reference; not a design allowable or certificate.

Basis: typical | Verification: single-source | Source: kaiser7050 | Checked: 2026-10-14

T7451 | Sheet, coil, plate

Tensile strength	Yield / proof strength	Thickness / specimen scope
524 MPa	469 MPa	Longitudinal; 0.500 inch diameter specimen; thickness unspecified

Condition: Supplier reference; not a design allowable or certificate.

Basis: typical | Verification: single-source | Source: kaiser7050 | Checked: 2026-10-14

Alloy 7050 / Composition and sources

Selected chemistry

No chemistry values published in this partial record.

Applications and selection guidance

Applications:

The displayed data is longitudinal and typical. It does not establish transverse allowables or part qualification. Melting range is withheld because the source Celsius and Fahrenheit lower limits disagree.
